Research Assistant Positions - NYU Child Study Center, Institute for Pediatric Neuroscience

Applications are currently being invited for a multiple 2-year research position available at the NYU Child Study Center starting in the Spring/Summer of 2011. The Institute for Pediatric Neuroscience makes use of innovative fMRI imaging approaches to examine the neural correlates of pediatric psychiatric illnesses, such as ADHD, autism, anxiety and depression. Our lab is a collaborative environment where research assistants have the opportunity to gain excellent clinical and research experience, with the potential for publication. Salary is competitive and benefits include health, vision, and dental.

Responsibilities include coordinating studies, recruiting participants, MRI scanning, data-analyses, database management, cognitive testing, and maintaining IRB compliance. Applicants should have a B.A. or B.S. in neuroscience, biology, psychology, computer sciences, engineering or other related scientific fields. The ideal candidates will have prior research experience, strong interpersonal skills, strong written and oral communication, and the ability to work as a member of a team as well as independently. Technical skills are a plus, but not required.

The position will start this Spring/Summer (2011). To apply, please contact Sabine Khoury, at Sabine.Khoury@nyumc.org, Dr. Michael Milham at Michael.Milham@nyumc.org, and Dr. Adriana Di Martino at Adriana.Dimartino@nyumc.org. Please attach a resume or CV, including the names of 3 references, to your inquiry.
