All adolescents who participated in the Teen Health Study are invited to participate in the Transition Times Study. Participants will be in their senior year of high school when they begin the study. Beginning in their senior year, participants will complete an online questionnaire once a year for three years. If they do not have access to a computer then they can complete a paper questionnaire. In addition, each participant will complete three 24 hour recall interviews over the phone in years 1 and 2 of the study. For youth with diabetes, metabolic control (HbA1c) will be obtained from medical records. Parents will also complete a brief on-line questionnaire each year.

Year 1: All adolescents are paid $50.00 for completing the online or paper questionnaire. They also will be paid $25.00 for completion of each of the three 24-hour recall phone interviews. If they complete all three follow up interviews then they will receive a bonus of $25.00 for a total of $150.00. Parents will be paid $25.00 if they complete the online questionnaire.

Year 2: the same as year 1.

Year 3: Young adults will be paid $50.00 for the online or paper questionnaire. Parents will be paid $25.00.
