Correction to Pressman et al. (2005)

In the article “Loneliness, Social Network Size, and Immune Response to Influenza Vaccination in College Freshman,” by Sarah D. Pressman, Sheldon Cohen, Gregory E. Miller, Anita Barkin, Bruce S. Rabin, and John J. Treanor (*Health Psychology*, 2005, Vol. 24, No. 3, pp. 297–306), Figure 3 on p. 303 was incorrect. The white bar in the “Medium Network” section of the graph (labeled “N = 13”) should be gray to represent “Medium Loneliness,” and the bar to its right (labeled “N = 4”) should be white to represent “High Loneliness.”
